

INTERLOCK

The website is conceived as a digital collage, an interactive landscape where fragments of the project come together through movement, layering, and discovery.

The website mirrors the logic of the project itself, where parts interlock to form a whole. Instead of fixed drawings, it invites navigation: images overlap like architectural ideas in process, and each hotspot opens a world of relations: between housing, exhibition, threshold, and pool.

"Local businesses breathe life into the streets, fostering a sense of identity. Pools, gardens and art installations reflect the city's dynamic spirit"

"In reimagining the old, there's space to imagine the new. By revitalizing neglected structures, and adding to them instead of demolishing, abandoned spaces find new purpose, becoming vibrant hubs of community life once again"

INTERLOCK

P O O L

The image displays architectural drawings for a project titled "DRAWINGS". It includes a perspective view of a building with a grid-like facade, a section view showing internal structure, and a plan view showing the building's footprint and surrounding context.

PURPOSE STATEMENT

THE PURPOSE OF THIS STUDY IS TO INVESTIGATE THE EFFECTS OF A NEW MEDICATION ON THE LIVER FUNCTION OF PATIENTS WITH CHRONIC LIVER DISEASE. THE STUDY WILL BE CONDUCTED OVER A PERIOD OF 12 WEEKS, WITH PATIENTS RANDOMIZED TO EITHER THE NEW MEDICATION OR A PLACEBO. THE PRIMARY ENDPOINT IS THE CHANGE IN LIVER ENZYME LEVELS, AND THE SECONDARY ENDPOINTS ARE THE INCIDENCE OF ADVERSE EVENTS AND THE PATIENTS' QUALITY OF LIFE. THE STUDY WILL BE CONDUCTED IN ACCORDANCE WITH THE ETHICAL STANDARDS OF THE INSTITUTION AND THE DECLARATION OF HELSINKI.
